

120 mm ROUND

with HE-FRAG MORTAR BOMB

The 120mm mortar round with high-explosive fragmentation bomb made of sphero-graphite cast iron for 120mm mortar is intended for use against enemy manpower located in the open, in unarmored vehicles and machine-gun nests. The enhancement of the fragmentation effect is a result of the powerful explosive material and the high mechanical properties of the body.

TECHNICAL DATA

Length of fuze round, max, mm	675
Caliber, mm	120
Weight of the round, kg	16
Armament	TNT
Weight of explosive charge, kg	1,64
Muzzle velocity, max, m/sec	274
Maximum range, m	5840
Fuze	V-RM

WEAPON SYSTEM

PM-38, PM-43, M-120,
2B11 Mortars

PACKING

2 rounds in a wooden case	
Overall dimensions, mm	945x345x230
Gross weight, kg	50
