

82 mm ROUND

with HE-FRAG MORTAR BOMB

The 82mm mortar round with high-explosive fragmentation bomb made of sphero-graphite cast iron for 82mm mortar is intended for use against enemy manpower located in the open, in unarmored vehicles and machine-gun nests. The enhancement of the fragmentation effect is a result of the powerful explosive material and the high mechanical properties of the body.

TECHNICAL DATA

Length of fuze round, max, mm	332
Caliber, mm	82
Weight of the round, kg	3,10
Armament	TNT
Weight of explosive charge, kg	0,46
Muzzle velocity, max, m/sec	211
Maximum range, m	3130
Fuze	O-4N

WEAPON SYSTEM

2B14, BM-37, BM-41,
BM-43, M82MA Mortars

PACKING

12 rounds in a wooden case	
Overall dimensions, mm	653x440x268
Gross weight, kg	56
