

PG-7VM HOLLOW-CHARGE PRACTICE ROUND

PG-7VM practice round with hollow-charge is live round with practice warhead and is used for training of personnel and live fire against targets where it leaves traces of impact.

The practice round possesses the same dimensions, weight and ballistic characteristics as a live ammunition.

The use of practice rounds preserves the practice targets at firing ranges, reduces the probability of starting a fire and increases the safety while conducting demonstrative and training firing.

TECHNICAL DATA

CHARACTERISTICS

| | |
|--|----------|
| Grenade launcher caliber, mm | 40 |
| Warhead caliber, mm | 70,5 |
| Weight of round, kg | 1,975 |
| Weight of grenade, kg | 1,600 |
| Weight of propellant charge, kg | 0,375 |
| Muzzle velocity, m/s | 140 |
| Direct fire range, m | 300 |
| Sighting range, m | 500 |
| Safe operational temperature range, °C | -40...50 |
| Rate of fire, rds/min | 4...6 |

WEAPON SYSTEM

RPG-7V portable anti-tank grenade launcher fitted with combined optical-mechanical sight

PACKING

| | |
|--------------------|-------------|
