

14.5mm Machine gun Warrior KPVT is powerful automatic weapon designed to be installed on armored personnel carrier/vehicle and tanks. The machine gun could be installed on tripod also.

The machine gun is an effective weapon, designed to combat lightly armored targets, firepower and enemy forces, including air, waterborne and shore-based targets. For shooting are used armour-piercing incendiary bullets (API) and armour-piercing incendiary tracer bullets (API-T) and other types of bullets.

The Warrior 14.5x114mm KPVT is available in version with anti-aircraft tripod, which is controlled by servo drives, electric trigger, joystick and a Digital Day/Night IR sight
